VOLUME 2 – RECIPROCATING COMPRESSORS

PART 1

INDEX

I.- AUTHOR'S EXPERIENCES – ENG. ALBERTO MTZ LLAURADO.

II.- ACKNOWLEDGMENT

III.- PROLOGUE

IV.- OBJECTIVES AND GOALS IN RELIABILITY FOR RECIPROCATING COMPRESSORS

V.- INTRODUCTION & HISTORY

SECTION 1.- COMPRESSORS, CLASSIFICATION, TYPES IN OIL & GAS & PETROCHEMICAL INDUSTRY, INDUSTRIAL APPLICATIONS.

VI.- COMPRESSORS — CLASSIFICATION

A.- DESIGN CLASSES

B.- CLASSIFICATION BY EQUIPMENT TYPE

C.- CLASSIFICATION OF COMPRESSOR APPARATUSES BY OPERATION PRINCIPLES

D.- CLASSIFICATION OF COMPRESSOR MACHINES BY OPERATION PRINCIPLES

E.- DESIGN CLASSES OF COMPRESSOR MACHINES

F.- DESIGN CLASSES OF POSITIVE DISPLACEMENT COMPRESSORS

G.- BASIC FUNCTIONAL CLASSES OF COMPRESSOR MACHINES

H.- FORMATION PRINCIPLES OF DERIVATIVE FUNCTIONAL CLASSES FOR COMPRESSOR MACHINES

I.- FUNCTIONAL CLASSES OF COMPRESSOR APPARATUSES

J.- DESIGN CLASSES OF THE AGGREGATED COMPRESSOR EQUIPMENT, TERMS AND DEFINITIONS

K.- DESIGN CLASSES OF GEARED MECHANICAL COMPRESSORS

L.- DESIGN CLASSES OF DRIVER-COMPRESSORS

M.- DESIGN CLASSES OF GEARED DRIVER-COMPRESSORS

N.- DESIGN AND SERVICE-DUTY CLASSES OF COMPRESSOR PLANTS

O.- DESIGN CLASSES OF PACKAGED COMPRESSOR PLANTS

P.- COMPRESSOR-NUMBER CLASSES

Q.- ENCLOSURE-TYPE CLASSES

VII.- TYPES OF COMPRESSORS IN THE OIL, GAS AND PETROCHEMICAL INDUSTRY

VIII.- PERFORMANCE CALCULATIONS FOR RECIPROCATING COMPRESSORS

IX.- RECIPROCATING COMPRESSOR PERFORMANCE AND SIZING FUNDAMENTALS

1.- INTRODUCTION

2 CAPACITY LOSSES

3 VALVE PRELOAD

- 4 VALVE AND GAS PASSAGE THROTTLING
- 5 PISTON RING LEAKAGE
- 6 PACKING LEAKAGE
- 7 DISCHARGE VALVE LEAKAGE
- 8 SUCTION VALVE LEAKAGE
- 9 HEATING EFFECTS
- 10 PULSATION EFFECTS
- 11 HORSEPOWER
- 12 HORSEPOWER ADDERS

X.- RECIPROCATING COMPRESSORS APPLICATIONS - Process Plant Machinery

- 1.- CLASSIFICATION OF RECIPROCATING COMPRESSORS
 - 1.1. Compressors with Cylinder Lubrication
 - 1.2. Compressors with Nonlubricated Cylinders
 - 1.3. Capacity Range of Reciprocating Compressors versus Other Compressors
 - 1.4. Trunk-Piston Compressors
 - 1.5. Crosshead-Type Compressors With Cylinder Lubrication
 - 1.6. Compressors With Water-Lubricated Cylinders
- 2. ACETYLENE COMPRESSORS
- 3. COMPRESSORS FOR THE PRODUCTION OF LOW-DENSITY POLYETHYLENE
 - 3.1. *Cylinders and Piston Seals*
- 4.- COMPRESSING DIFFICULT GASES
- 5.- COMPRESSORS WITH DRY-RUNNING PISTON RINGS
- 6.- LABYRINTH-PISTON COMPRESSORS
 - 6.1. Design Philosophy
 - 6.2. Labyrinth-Piston Compressors versus Compressors With Dry-Running Piston Rings
 - 6.3. Piston-Rod Glands
 - 6.4. Typical Applications For Labyrinth-Piston Compressors
- 7.- CAPACITY CONTROL
- 8. VARIABLE-SPEED CONTROL

SECTION 3.- MEASURING RELIABILITY, MAINTAINABILITY, MEANING OF BENCHMARKING.

XI.- MEASURING AND DESIGNING FOR RELIABILITY AND MAINTAINABILITY

- 1.- INTRODUCTION
- 2.- WHAT AND WHY RELIABILITY?
- 3.- WHY IS RELIABILITY IMPORTANT?
- 4.- AVAILABILITY
- 5.- THE BATHTUB CURVE AND RELIABILITY DISTRIBUTION
- 6.- RELIABILITY APPROACH IN DESIGN
- 7.- RELIABILITY ANALYSIS
- 8.- MAINTAINABILITY ANALYSIS
- 9.- SYSTEM SAFETY AND HAZARD ANALYSIS
- 10.- HUMAN FACTORS ENGINEERING ANALYSIS

- 11.- LOGISTICS ANALYSIS
- 12.- *DESIGN REVIEWS CHECKLIST*
- 13.- SUMMARY

- XII.- THE MEANING OF BENCHMARKING AND BENCHMARKS
 - 1.- WHAT IS BENCHMARKING?
 - 2.- SUMMARY

Compressor Components—Compliance with NACE MR0175

XXIV.- PULSATION AND VIBRATION CONTROL IN POSITIVE DISPLACEMENT MACHINERY SYSTEMS FOR PETROLEUM, PETROCHEMICAL, AND NATURAL GAS INDUSTRY SERVICES

API RECOMMENDED PRACTICE 688

PART 1: PULSATION AND VIBRATION CONTROL FUNDAMENTALS FOR POSITIVE DISPLACEMENT MACHINERY

P1- 1 SCOPE

P1- 3 FUNDAMENTALS OF PULSATION AND MECHANICAL VIBRATION THEORY

P1- 3.1 Overview of Pulsation Concepts

3.1.1 Excitation Sources

3.1.2 Acoustic Response and Resonance

3.1.3 Effects of Pulsation

3.1.3.1 Shaking Force

3.1.3.2 Vibration

3.1.3.3 Fatigue Failure, Piping, and Support Degradation

3.1.3.4 Compressor Performance and Overload

3.1.4 Pulsation Control Methods

3.1.4.1 Surge Volumes

3.1.4.2 Low-Pass Filters

3.1.4.3 Orifices

3.1.4.4 Pressure Drop Considerations

P1- 3.2 OVERVIEW OF MECHANICAL CONCEPTS

3.2.1 Basic Beam Theory

3.2.2 Resonance

3.2.3 Amplification Factor

3.2.4 Separation Margins

3.2.5 Non-Resonant Shaking Force Limits for Piping Systems

3.2.6 Design Vibration Limits

3.2.7 Guidelines for Mechanical Analysis

P1- 4.5 DESIGN APPROACH AND PHILOSOPHY SELECTION GUIDELINES

4.5.1 Power per Cylinder

- 4.5.2 Load Steps
- 4.5.3 Percent of Rated Rod Load
- 4.5.4 Speed
- 4.5.5 Discharge Pressure
- 4.5.6 Suction Pressure
- 4.5.7 Number of Stages/Number of Cylinders
- 4.5.8 Number of Units On Line
- 4.5.9 Service/Gas
- 4.5.10 Other Considerations

P1- 6 RESULTS REPORTING GUIDELINES

- P1- 6.1 SCOPE
- P1- 6.2 RESULTS

P1- 7 FIELD TESTING

- P1- 7.1 CONFIRMATION THAT DESIGN REQUIREMENTS HAVE BEEN MET
- P1- 7.2 VIBRATION PROBLEMS
- P1- 7.3 EXCESSIVE PRESSURE DROP
- P1- 7.4 PREMATURE VALVE FAILURE
- P1- 7.5 DRIVER OVERLOAD
- P1- 7.6 FAILURE TO DELIVER EXPECTED FLOW

P1- 8 VALVE DYNAMIC PERFORMANCE ANALYSIS

- P1- 8.1 THE VDPA MODEL
- P1- 8.2 VALVE RELIABILITY AND EFFICIENCY
- P1- 8.3 APPLICATION OF ANALYSIS RESULTS TO VALVE SELECTION
 - 8.3.1 Valve Closure Timing
 - 8.3.2 Valve Flutter
 - 8.3.3 Power and Capacity Losses
 - 8.3.4 Impact Velocity

P1- 8.4 VALVE DYNAMICS ANALYSIS REPORT

XXIV.- PART 2: RECIPROCATING COMPRESSORS

P2- 1 GENERAL

P2- 2 COMMENTS ON API 618, 5TH EDITION, CLAUSE 7.9 – PULSATION AND VIBRATION CONTROL

XXV.- RECOMMENDATIONS FOR REDUCING COMPRESSOR TOTAL LIFE COST AND IMPROVING SYSTEM PERFORMANCE

- 1.- HOW TO ASSESS DESIGN OPTIMIZATION OPPORTUNITIES —

- 9.- CONCLUSION

XXXVIII.- MONITORING MECHANICAL BEHAVIOUR OF RECIPROCATING COMPRESSORS

- 1.- WHICH PARAMETERS SHOULD BE MONITORED?
- 2.- THE API 670 ABOUT RECIPROCATING COMPRESSORS

XXXIX.- FOUR IMPORTANT PARAMETERS FOR RECIPROCATING COMPRESSORS

- 1.- IMPACT
- 2.- TEMPERATURE
- 3.- VIBRATION
- 4.- ROD DROP MEASUREMENT

XL.- TRANSMITTER-BASED SYSTEMS VERSUS CENTRALIZED SYSTEMS

XLI.- A DEEPER INSIGHT INTO ROD DROP MONITORING

- 1.- RIDER BAND WEAR
- 2.- ROD DROP MEASUREMENTS
- 3.- ROD DROP MEASUREMENT METHODS
- 4.- ROD DROP MONITORING SOLUTIONS
- 5.- ISTEK RECIPSYS 200
- 6.- REAL-TIME MACHINERY PREDICTION FOR RECIPROCATING COMPRESSORS
- 7.- DIAGNOSING RECIPROCATING COMPRESSOR FAULTS

XLII.- CONDITION MONITORING FOR RECIPROCATING COMPRESSORS - STATE OF THE ART

- 1 INTRODUCTION
- 2 CONDITION MONITORING FOR RECIPROCATING COMPRESSORS
 - 2.1 Maintenance strategies
 - 2.2 Technical requirements
- 3 MONITORING OF SUCTION AND DISCHARGE VALVES
 - 3.1 Valve pocket temperatures
 - 3.2 P-V Diagram Analysis
 - 3.3 Vibration Analysis
- 4 PACKINGS
- 5 PISTON AND RIDER RINGS
- 6 VALVE UNLOADERS
- 7 RUNNING GEAR
8. CONCLUSION

XLIII.- RECIPROCATING COMPRESSORS – EQUIPMENT SELECTION

- 1.- SERVICE TYPES AND OPERATING CONDITIONS
- 2.- COMMON RECIPROCATING COMPRESSOR TYPES
- 3.- ADVANTAGES AND DISADVANTAGES COMPARED TO OTHER COMPRESSORS
- 4.- SPEED CONSIDERATIONS
- 5.- DRIVER OPTIONS
- 6.- ELECTRIC MOTORS
 - 6.1.- Motor Sizing
 - 6.2.- Induction Motors
 - 6.3.- Synchronous Motors

6.4.- Advantage and Disadvantage Comparison: Induction vs. Synchronous Motors

6.5.- Motor Mechanical Effects

6.6.- Variable Frequency Drives

7.- ENGINES

8.- INTEGRAL ENGINE-COMPRESSORS

9.- TURBINES AND GEARBOXES

10.- COUPLINGS

11.- ENGINEERING SCOPE

11.1.- Packaged Units vs. Block-Mounted Units

11.2.- Importance of Pulsation Studies

11.3.- Frame and Skid Flexibility

11.4.- Testing Options

11.5.- Vibration Concerns

11.6.- Key Guidance From Standards

XLIV.- EXPERIENCES OF A NEW GENERATION OF MACHINERY MONITORING FOR RECIPS (2010S)

1 INTRODUCTION

2 TYPES OF MEASUREMENTS

2.1 Level (slow) data

2.2 Dynamic data (“phased”)

3 SPECIFIC MONITORING FOR RECIPS

3.1 How to analyse dynamic data

3.2 Phased acceleration monitoring

3.3 Individual limits per degree crank angle

3.4 Rod motion is more than rod drop

4 PREVENTION OF MAJOR DAMAGE

XLV.- DIAGNOSIS OF A CAPACITY CONTROL PROBLEM THAT APPEARED RANDOMLY

XLVI.- EVALUATING RECIPROCATING COMPRESSOR CONDITION USING ULTRASOUND AND VIBRATION PATTERNS

1.- PRESSURE-VOLUME PATTERNS

2.- VIBRATION vs CRANKANGLE PATTERNS

3.- ULTRASONIC vs CRANKANGLE PATTERNS

4.- CASE HISTORIES FROM SERVICE TECHNICIAN REPORTS

XLVII.- CONDITION MONITORING OF RECIPROCATING COMPRESSORS*

1 MAINTENANCE STRATEGIES

2 JUSTIFICATION FOR MACHINE MONITORING

3 WHAT TO MONITOR AND WHY

XLVIII.- PISTON ROD RUN-OUT IS A KEY CRITERION FOR RECIPROCATING COMPRESSORS

1.- INTRODUCTION

2.- HORIZONTAL RUN-OUT

3.- VERTICAL RUN-OUT

- 4.- NORMAL RUN-OUT
- 5.- ACCEPTABLE VERTICAL RUN-OUT
- 6.- MEASURING ROD RUN-OUT
- 7.- CORRECTING VERTICAL RUN-OUT
- 8.- EVALUATING VERTICAL RUN-OUT

XLIX.- RECIPROCATING COMPRESSOR ANALYSIS

1.- ANALYSIS OF THE COMPRESSOR USING A PRESSURE-VOLUME (PV) DIAGRAM

- 1.1 PV Sequence of Events
- 1.2 Suction Valve Leak
- 1.3 Discharge Valve Leak
- 1.4 Piston Ring Leakage
- 1.5 General Operation Limits
- 1.6 Pulsation Effects
- 1.7 Valve and Cylinder Gas Passage Losses
- 1.8 Excessively Strong Discharge Valve Springs
- 1.9 Excessively Strong Suction Valve Springs

2 COMPRESSOR PRESSURE/TIME (PT) PATTERNS

- 2.1 Double Acting Compressor Cylinders
- 2.2 Suction Pressure Time Trace
- 2.3 Discharge Pressure Time Trace
- 2.4 Head-End Pressure Time Trace (Internal Cylinder Pressure)
- 2.5 Abnormal Pressure Time (PT) Patterns
- 2.6 Passage Restrictions
- 2.7 Rod Load Reversal
- 2.8 Partially Covered Valves
- 2.9 Compressor Rod Loading
- 2.10 Rod Load Calculations

3 COMPRESSOR VIBRATION ANALYSIS

- 3.1 Use of An Analyzer
- 3.2 Normal Vibration Patterns
- 3.3 Compressor Cross Talk
- 3.4 Pressure Reversal
- 3.5 Normal Vibration Pattern Wrap-up

4 ABNORMAL VIBRATION/ULTRASONIC TRACES

- 4.1 Leaking Suction Valves
- 4.2 Leaking Discharge Valves
- 4.3 Leaking Rings
- 4.4 Cylinder Roughness

5 SYSTEMATIC COMPRESSOR ANALYSIS

- 5.1 Data Validity (Basic PV/PT)
- 5.2 Corrections (VEs, VEd, CRC, Ps, Pd, MCA)
- 5.3 Theoretical PT/PV
- 5.4 Trend (All Collected Data)
- 5.5 Compression Ratios
- 5.6 System (Valve) Losses
- 5.7 Capacity
- 5.8 Ratio of Capacities (ROC)
- 5.9 SVE and DVE
- 5.10 Discharge Temperature Delta

- 5.11 Rod Load
- 5.12 Valve Cap Temperatures
- 5.13 Cross Head Knock
- 5.14 Gas passage noise as expected
- 5.15 Impacts as Expected
- 5.16 Cylinder Stretch/Flap Analysis
- 5.17 Condensed Liquids Entrapped In The System
- 5.18 Steps in the Cylinder, Ring Land, and Wear Band Looseness
- 5.19 Other Types of Looseness
- 5.20 Unloader Faults and Problems

L.- COMPRESSOR AND PIPING SYSTEM SIMULATION

1 INTRODUCTION

2 GENERAL MODELING CONCEPTS

3 PREDICTING PULSATATIONS, VIBRATIONS, AND STRESS

- 3.1 Pulsations and Piping Acoustics
- 3.2 Time Domain Models In Reciprocating Compressors
- 3.3 Frequency Domain Acoustic Models
- 3.4 Piping Mechanical Models
- 3.5 Compressor Immediate Mechanical Analysis
- 3.6 Dynamic Stress Models

4 RECIPROCATING COMPRESSOR PRESSURE VOLUME ANALYSIS

5 VALVE MOTION MODELS

6 THERMAL FLEXIBILITY MODELS

- 6.1 Piping Thermal Effects—Forces, Moments, Stresses
- 6.2 Forces and Moments on Machinery
- 6.3 Forces and Moments on Coolers
- 6.4 Buried Piping Models

LI.- ANALYZING RECIPROCATING COMPRESSORS WITH AN ANALYZER

LII.- RECIPROCATING, POSITIVE DISPLACEMENT - TROUBLESHOOTING

LIII.- TROUBLESHOOTING CHART - POSITIVE DISPLACEMENT COMPRESSORS

LIV.- APPLICATION AND OPERATING HISTORY OF MODERATED SPEED

API-618 RECIPROCATING COMPRESSORS

- 1.- DEFINITION OF LOW- AND MODERATE-SPEED
- 2.- RELATIONSHIP BETWEEN ROTATING AND PISTON SPEED
- 3.- HISTORICAL PRESPECTIVE OF COMPRESSOR DESIGNS.
- 4.- ALLOWABLE OPERATING SPEEDS
- 5.- FORCES AND MOMENTS
- 6.- MODERATE SPEED COMPRESSOR DESIGNS
- 7.- COMPRESSOR CYLINDERS
- 8.- OPERATING HISTORY
- 9.- CONCLUSION

LV.- UPDATING TEMPERATURE MONITORING ON RECIPROCATING COMPRESSOR CONNECTING RODS TO IMPROVE RELIABILITY

1. INTRODUCTION
2. DISCUSSION OF THE PROJECT
3. INTEGRATION DETAILS
4. RELIABILITY
5. HARDWARE AND SOFTWARE SPECIFICATION AND JUSTIFICATIONS
6. COST FACTOR ESTIMATES
7. POTENTIAL PROBLEM AREAS
8. RECOMMENDATIONS AND CONCLUSIONS

LVI.- CRANKSHAFT PROTECTION:

GUIDELINES FOR OPERATORS OF SLOW SPEED INTEGRAL ENGINE /COMPRESSORS

- 1.0 INTRODUCTION
- 2.0 BACKGROUND
- 3.0 LIST OF BEST PRACTICE GUIDELINES
 - 3.1.- Installation
 - 3.2.- Operation
 - 3.3.- Condition Monitoring and Inspection
 - 3.4.- Protection Systems
 - 3.5.- Condition Monitoring, Criteria, Analysis, and Action

LVII.- RESEARCH OF HIGH PRESSURE PISTON ROD PACKINGS

- 1 INTRODUCTION
- 2 RING WEAR
- 3 PRESSURE DISTRIBUTION AND CONTACT PRESSURE IN THE PISTON ROD PACKING
 - 3.1 Contact seal rings
 - 3.2 Labyrinth rings
- 4 SEALING EFFECT OF METALLIC CONTACT SEALS
- 5 CONCLUSIONS

LVIII.- HIGHER PRESSURES ON DRY-RUNNING COMPRESSORS*

LIX.- HYPERCOMPRESSORS*

- 1 INTRODUCTION
- 2 MISCELLANEOUS PROBLEMS
- 3 CONCLUSIONS

LX.- VERY HIGH PRESSURE COMPRESSORS - (over 100 MPa [14500 psi])

- 1 DESIGN PROCEDURE
 - 1.1 General Information on High Pressure Services
 - 1.2 Features of the Machines for LDPE Services
 - 1.3 Crank gear Arrangements

1.4 Characteristics of Cylinders

1.5 Safety Aspects

2 STRESS CONSIDERATIONS

2.1 Heavy-walled Cylinders Under Pressure

3 PACKING AND CYLINDER CONSTRUCTION

3.1 Technical Solution for Cylinder Components

3.2 Sliding Seals Between Piston and Cylinder at Very High Pressures

3.3 Autofrettage of Various Cylinder Components

3.4 Typical Behaviour of Packings

**LXI.- SPECIAL CONSIDERATIONS DRIVING RECIPROCATING
COMPRESSORS FOR ELECTRIC MOTORS**

1.- Motor cooling fans

2.- Follow-up tests during operation

**LXII.- ELECTRIC MOTORS FOR RECIPROCATING COMPRESSORS AND
CONDITION MONITORING**

1.- Introduction

2.- Large synchronous motors for reciprocating compressors

3.- Condition monitoring, predictive maintenance and optimization of drive train operation

**LXIV.- RECIPROCATING COMPRESSORS COUPLED TO GAS TURBINE
DRIVERS IN GAS INDUSTRY OF THE RUSSIAN FEDERATION**

1 Introduction

1.- GCU FLEET OF GAZPROM: TRENDS AND PRESENT CONDITIONS.

2.- RECIPROCATING GCU WITH THE GAS TURBINE DRIVE – APPLICATIONS AND DESIGN.

2.1 Applications of centrifugal and reciprocating compressor units

2.2 Reciprocating Compressor Units with Gas Turbine Drive

3.- MANUFACTURING OF GAS TURBINES AND RECIPROCATING COMPRESSORS IN RUSSIAN
FEDERATION.

4.- PARTICULARS OF TRCP DEVELOPMENT
